ACRYLIC COATINGS FOR INTERIORS

IRIDEA ACRYLIC is a wide range of **acrylic coatings** from ICA: matt and gloss, open pore and closed pore, transparent and pigmented. They are particularly recommended for use on light-colored wood, chemically bleached wood, wood with an open-pore finish and cycles that require transparency (since they are formulated with colorless resins), resistance to yellowing and elasticity.

These include the **OAC363G.. matt acrylic top coat**, which leaves the coated object with a highly uniform matt result, offering excellent coverage and guaranteeing superb chemical/physical and mechanical resistance.

Spray, roller, curtain coater or electrostatic application

CHARACTERISTICS & ADVANTAGES

- Available in the following finishes: 10, 20, 30, 40, 55, 70, and 80 gloss.
- Highly uniform finish.
- Non-yellowing.
